What is this study about?

We are interested in what influences children's reaching and grasping for activities.

Who can participate?

- Children between 3- and 5-years
- Children with and without Hemiplegic Cerebral Palsy (CP)

What is involved in participation?

Your child will participate in 2 experiments lasting about 2 hours. Each experiment involves a game requiring reaching and grasping for toys.

Does everyone get to participate right away?

Yes. We will enroll up to 15 children with hemiplegic CP and 15 children without CP into the study.

How much does it cost?

Participation in the study is **free**.

Where does the study take place?

Either in the clinics or at your own house or DIMPL at USC. Whatever you prefer!

Who do I call for more information?

Hsiang-Han Huang, MS
