

CHAMPS: Child Habilitation and Motor Performance Skills

CHAMPS aims to investigate how children and adolescents with and without cerebral palsy differ from adults in the way they learn new motor skills. Results of this study will help in the development of rehabilitation programs for individuals with cerebral palsy.

We are looking for children with cerebral palsy (diplegia/ hemiplegia) :

- Age: 8-14 years
- Interested in participating in the study

Participants receive

- Free testing of their visual perception
- A "Simpson" toy
